SUMMARY

Cybersecurity Graduate Student with hands-on experience in SIEM monitoring, threat detection, and security automation. Proven background in automating vulnerability assessments via Python, triaging security alerts against the MITRE ATT&CK framework, and engineering containerized lab environments. Looking to apply my technical skills, grow through real-world challenges, and contribute to keeping systems and data secure.

TECHNICAL SKILLS

- **Security Operations:** SIEM Monitoring ,alert triage, phishing analysis, incident response
- **Network Analysis:** Packet inspection, traffic analysis, Security Onion
- **Tools:** Nmap, Burp Suite, Metasploit, Wireshark
- **OT/ICS Protocols:** Modbus /TCP ADU, PLC Address Mapping, IPv4/IPv6 Subnetting
- **Scripting:** Python, Bash
- **Certifications:** Google Cybersecurity Professional
- **Pathways:** TryHackMe (Jr. PenTester, Web Fundamentals), HackTheBox (CDSA)

INTERNSHIP EXPERIENCE

Red Team Analyst Intern

June 2024 - December 2024

DeepCytes Ventures Pvt. Ltd., Mumbai, India

- Engineered and optimized custom Python automation scripts to integrate open-source security tools into the core SaaS platform, increasing vulnerability scanning throughput.
- Updated and standardized automated testing workflows to align with company-specific vulnerability assessment methodologies and compliance rules.
- Generated comprehensive vulnerability documentation and structured remediation reports to assist engineering teams in tracking and patching high-risk findings.

Technical Support Engineer Intern

December 2023 - January 2024

Network TechLab Pvt. Ltd., Mumbai, India

- Monitored centralized SIEM dashboards and successfully triaged 20+ daily security alerts across diverse enterprise client environments.
- Mapped triggered security alerts to specific MITRE ATT&CK adversary techniques to accelerate threat escalation and incident containment.
- Served as the primary technical point of contact for clients during initial threat detection, delivering clear incident notifications and diagnostic data.

Research Intern

January 2023 - April 2023

Shah and Anchor Kutchhi Engineering College, Mumbai, India

- Conducted research on Onion Router (Tor) networks to track and document illicit marketplaces.
- Compiled reports detailing the structure and risks associated with Deep Web ecosystems.

ACADEMIC PROJECTS

- | | |
|---|---------------|
| Controlled Payload Simulation & Detection, Shah and Anchor Kutchhi Engineering College | November 2022 |
| <ul style="list-style-type: none">• Developed custom payloads using SET and Weevely to test EDR/Antivirus bypass techniques, identifying critical defensive blind spots. | |
| Dockerized CTF Challenge Development, Shah and Anchor Kutchhi Engineering College | April 2024 |
| <ul style="list-style-type: none">• Engineered a scalable, containerized lab environment using Docker for vulnerability analysis.• Developed custom challenges focused on Web Exploitation and Privilege Escalation. | |

ACTIVITIES

- CTF Participant (OWASP-TCET, IITB-CTF) - Web, OSINT, Crypto, Privilege Escalation
- Industry exposure to networking, IDS, and digital forensics tools.

EDUCATION

Master of Science in Cybersecurity	Expected May 2027
University of Houston- Houston, Texas	

Bachelor of Technology in Cybersecurity	
Shah & Anchor Kutchhi Engineering College - Mumbai, India	June 2025
