EDUCATION

Master of Science in Cybersecurity
University of Houston- Houston, Texas

May 2027

PROFESSIONAL SUMMARY

Cybersecurity graduate student with hands-on experience in SIEM monitoring, alert triage, and incident analysis. Experienced in modifying security tooling via Python, simulating adversary techniques, and building containerized lab environments. Looking to apply my technical skills, grow through real-world challenges, and contribute to keeping systems and data secure.

TECHNICAL SKILLS

- **Security Operations:** SIEM Monitoring ,alert triage, phishing analysis, incident response
- **Network Analysis:** Packet inspection, traffic analysis, Security Onion
- **Tools:** Nmap, Burp Suite, Metasploit, Wireshark
- **OT/ICS Protocols:** Modbus /TCP ADU, PLC Address Mapping, IPv4/IPv6 Subnetting
- **Scripting:** Python, Bash
- **Certifications:** Google Cybersecurity Professional, TryHackMe (Jr. PenTester, Web Fundamentals)

EXPERIENCE

Red Team Analyst Intern June 2024 - December 2024
DeepCytes Ventures Pvt. Ltd., Mumbai, India

- Modified and maintained Python-based automation scripts to integrate open-source security tools into the company's core SaaS platform.
- Updated internal testing logic to ensure automated scans aligned with company-specific vulnerability assessment methodologies.
- Documented the scripts by creating reports and mapped findings for remediation tracking.

Technical Support Engineer Intern December 2023 - January 2024
Network TechLab Pvt. Ltd., Mumbai, India

- Monitored a centralized SIEM dashboard, triaging 20+ daily security alerts for client environments.
- Maintained consistent communication with clients, providing timely notification of potential security incidents and initial alert data.
- Gained hands-on experience with the MITRE ATT&CK framework by mapping triggered alerts to specific adversary techniques.

Research Intern January 2023 - April 2023
Shah and Anchor Kutchhi Engineering College, Mumbai, India

- Conducted research on Onion Router (Tor) networks to track and document illicit marketplaces.
- Compiled reports detailing the structure and risks associated with Deep Web ecosystems.

ACADEMIC PROJECTS

Controlled Payload Simulation & Detection, Shah and Anchor Kutchhi Engineering College

November 2022

- Developed custom payloads using SET and Weevely to test EDR/Antivirus bypass techniques, identifying critical defensive blind spots.

Dockerized CTF Challenge Development, Shah and Anchor Kutchhi Engineering College

April 2024

- Engineered a scalable, containerized lab environment using Docker for vulnerability analysis.
- Developed custom challenges focused on Web Exploitation and Privilege Escalation.

ACTIVITIES

- CTF Participant (OWASP-TCET, IITB-CTF) - Web, OSINT, Crypto, Privilege Escalation
- Industry exposure to networking, IDS, and digital forensics tools.
